January 27, 2014

Dear Dr. King,

I would like to share our story with you. My husband, Maurie, was diagnosed with stage 4 metastatic amelanotic melanoma in the right chest area in March of 2009 at Mayo Clinic in Minnesota. We were told that there was no known cure, however, they put him on a experimental study consisting of Avastin and Temodar treatments. His tumors shrunk some but after 8 months, one of the tumors grew and so he was taken off the study. They told him he had, at best, about 2 months to live. That was in December 2009.

In January, we contacted Cathy Murphy from Moline, IL. We had met her briefly at a friend's home several years earlier, and she gave us her phone number and said if we ever had anyone with cancer to call her. We did, and she introduced us to TKM. My husband had begun taking large doses of a natural immune product (Orenda Int.) and we began working with Cathy daily, monthly & yearly. After several months of treatment with TKM, physicians could no longer detect any tumors. We continued to do treatments and Maurie had 4 ½ years of cancer free, quality life.

Maurie passed away last May. He had an abscessed tooth pulled about 4 weeks before he died & was in pain from that. He had a CT scan, an x-ray, & an MRI during that time and no cancer was detected. He was 80 years old. We had 57 wonderful years together.

I give all the Glory to God for directing us to Cathy, and to the amazing TKM. I have done the 1 and 2 studies on CD, and I am a firm believer of your wonderful work. I will keep on learning and sharing as long as the Lord allows. Cathy Murphy has been with us all the way and I thank God for her love and support.

Please accept this donation to The King Institute in loving memory of my husband Maurie.

May God Bless You and all the work you do.
Sincerely,

Sharon Richardson
